

ADDITIONAL INFORMATION ON FCFS BOOKING VIA PRISMA

All FCFS-offers on **PRISMA** are additional products to existing *Storage Services Agreement(s)*. All terms and conditions of the existing *Storage Services Agreement(s)* between **SEFE Storage** and the *Storage Customer* at the respective *Storage Location* therefore apply to these additional bookings.

The FCFS-tariffs are i.a. calculated with reference on the changing energy costs, so that the tariffs are subject to corresponding adjustments. **SEFE Storage** will inform about the current tariffs and products by e-mail in good time. The applicable tariffs and products will be displayed during the booking process on **PRISMA**.

The FCFS-contract is initiated by the *Storage Customer's* booking request and is concluded by a booking confirmation via e-mail from **SEFE Storage**. The allocation of capacity is subject to availability.

Concluded FCFS-contracts and the capacities booked thereunder will be allocated to the *Storage Customer's* existing *Storage Account* in the respective *Storage Location*.

Your way to the FCFS booking:

 Registered PRISMA users must select the desired *Storage Location* from the drop-down menu via the [Storage] header and the [FCFS] submenu and confirm with [Select] (example below: UGS Rehden - interruptible injection capacities).
